

LINDENWOLD PUBLIC SCHOOLS

MEDIA/INTERNET OPT OUT FORM

(Fill this form out only if you **DO NOT** wish your child to participate.)

Lindenwold Public Schools is proud of the many accomplishments of our students. Whether they are involved in academics, extra-curricular, or social activities, our students make us proud. We often film and take pictures at these events. These photos and videos are used for the District Channel 192, our district website, district social media pages, and other publications. If you **do not** wish to have your child's individual likeness included in these publications, you **must** contact us in writing by completing the media release policy form located in the "forms to return" packet.

I understand, per Policy #9120, group photographs may be released by the district without permission, but in no event will an individual student in a group photograph be identified by name and/or by other personal identifier(s) without written permission from the parent(s) or legal guardian(s), or the adult student.

I do not give permission to allow my child to be individually videotaped and/or photographed for use by the Lindenwold School District through its website, social media pages, cable channel, and the media as an individual student even without personal identifiers.

I HAVE READ THE DISTRICT INTERNET POLICY.

The Lindenwold School District operates a 1:1 Chromebook Program for students in grades 5 – 12 and offers a wide variety of academic opportunities in all grades which also includes access to the internet. Our curriculum and assessment practices do require access to the internet on school issued student Chromebooks and Desktops. Teachers vigilantly monitor the students as they use the internet, and a firewall is set up to block inappropriate sites. The District also utilizes Go Guardian, a program that allows the District to monitor websites and programs students access on school issued Desktop Computers at school and student issued Chromebooks at home and in school. Accessing the internet and utilizing computers are all required components of our district curricular programming.
